

Debra Walsh:

Debra Walsh is the Deputy Director (acting) of the National Center for Environmental Assessment (NCEA) within the United States Environmental Protection Agency (EPA). She has 30 years of experience in toxicology and risk assessment. Previously, Debra served as Deputy Director of the NCEA-RTP division for the last four years, and has a full array of scientific, administrative and technology skills given her long and successful career within EPA. Recently, she has lead the development of the Health and Environmental Research Online (HERO) system which has been recognized as a significant addition to health assessment documents by the National Academy of Sciences (NAS) and the EPA's Science Advisory Board (SAB). Her experiences include many years as a scientist and then as Program Operations Director for multiple divisions.
